

1. When pages comes down so the navigation must not hide, instead it must freeze at top
2. Change the design of buttons right corner – if you could give another touch for its design

1. If you could decrease little the height of slider
2. If you could add a label on the front of the slider so for each picture we place a label like a label with background transparent background – make sure we can control the text in localization

WELCOME TO EDTECH EQRA

Welcome to EdTech Application! Our platform is here to transform education through technology. With our user-friendly interface and advanced features, we offer an immersive learning experience for students, seamless lesson delivery for educators, and efficient management for institutions. Join us as we revolutionize education and empower learners to reach their full potential in a dynamic and engaging digital environment. At EdTech Application, we believe in making education accessible to all. With our flexible and inclusive platform, students can learn anytime, anywhere, breaking the barriers of traditional classrooms. We combine the latest advancements in education technology with personalized learning tools, virtual classrooms, and robust analytics to optimize the learning journey for every individual. Be a part of the EdTech revolution and embark on a transformative educational experience with us.

WE ARE PROVIDING A COMPLETE PLATFORM FOR EDUCATION ENHANCEMENT

High Contents

Rich library compose of extra curricula courses, documents, audio, and video lessons.

Collaboration and Interaction

To allow learners to interact and collaborate

Tracking Analytics

To track learners' progress, record their

Data Security and Privacy

Prioritizing data security and privacy, ensuring that

1. If you could adjust the spacing and make the paragraph and right side video frame same and equal in and add proper line spacing – as like now title is not in good place
2. If you remove the justify behavior of text-align for the small tabs as you can see its title is justified

CONTENTS

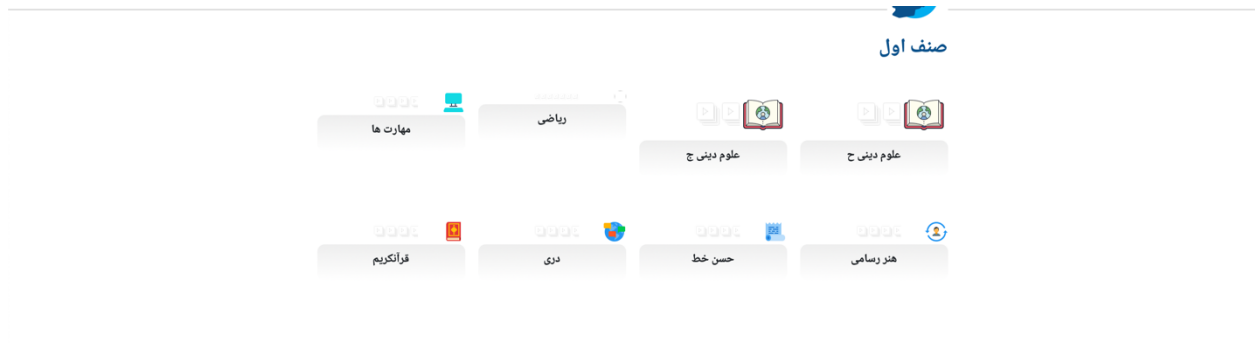

Grade	لومړۍ ټولګه
Instruction Language	پښتو
Number of Subjects	7
Number of Videos	0

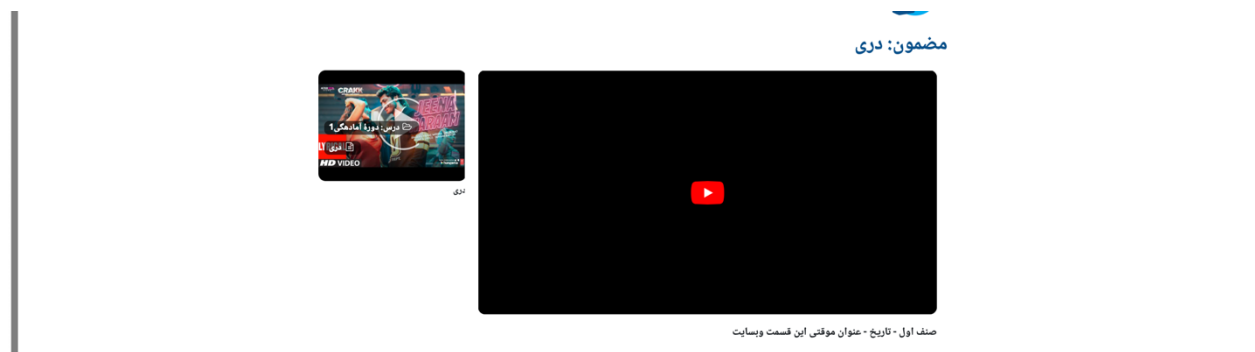

Grade	دوهم ټولګه
Instruction Language	پښتو
Number of Subjects	7
Number of Videos	0

1. There is pretty much space after 4th row
 - a. Either remove that space and make the media frame smaller too and place some graphic which indicate Grade 1 – like we can use 1 closed in a circle to describe Grade 1 – or like 1 written on blue paper – something like that with media player transparent icon on the front
 - b. It is also possible to try each row of the section having four smaller divs
 - i. Each div – at top media frame/graphics and then below that the description like we have news section in main dashboard
 - c. Make sure localization is managed for statis parts

1. I have added some icons to the lessons dynamic – like as of now the icons might be uploaded in various sizes like one big and one small – if you implement object-fit property or height:100% width:100% for each div or section

1. In thumbnail the text is not visible and also the number is coming is coming in wrong place and also there is no need for another label below the thumbnail
2. Make sure there is enough space between two thumbnails
3. Make sure it is managed in localization
4. Entire data comes is dynamic from DB

1. Make the page of request for access and contact us as we talked yesterday
 - a. Keep the request for access in popup and contact us in a separate page
